

NOAH RAGAN

FULL STACK SOFTWARE ENGINEER

Willow Springs, MO | noah.j.ragan@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer building product-focused applications across React, TypeScript, Python/Flask, Node/Express, PostgreSQL, REST APIs, testing, and cloud delivery. Built a four-product portfolio suite spanning intelligent planning, collaborative knowledge, travel coordination, and personal finance, with responsive UX, local-first persistence, API boundaries, CI/CD, and Firebase-ready authentication/shared-data architecture.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, Responsive Design

Backend: Python, Flask, Node.js, Express, REST APIs, SQLAlchemy, Marshmallow, Gunicorn

Data / Auth: PostgreSQL, SQL, SQLite, Firebase / Firestore, Authentication, Authorization, Local-first Persistence

Testing / Delivery: Pytest, Git, GitHub, GitHub Actions, CI/CD, Render, Vercel, Swagger/OpenAPI, Postman

SELECTED PRODUCT WORK

Planora - Intelligent Planning & Execution | [React / TypeScript / Express](#) | [Live](#) | [Source](#)

- Built a goal-to-execution workspace connecting goals, structured plans, milestones, tasks, Kanban, scheduling/calendar, Today views, global search, resources, and progress analytics; added responsive UX, persistent local data, and Firebase-ready per-user sync boundaries.

Threadline - Team Knowledge & Collaboration | [React / TypeScript / Express](#) | [Live](#) | [Source](#)

- Built a collaborative knowledge workspace with multi-workspace flows, channels, deep-linked discussions, replies/reactions, bookmarks, resolution workflows, searchable documentation, version history, board/timeline views, activity/inbox flows, and optional Firestore-backed shared-workspace architecture.

Wanderline - Collaborative Travel Planning | [React / TypeScript / Express](#) | [Live](#) | [Source](#)

- Built a shared trip-planning product spanning travelers, itinerary, saved places, lodging/reservations, budgets/expenses, packing, notes, live weather, sharing, mobile-first workflows, privacy-safe demo data, and Google Maps integration.

Ledgerly - Personal Finance | [React / TypeScript / Flask / PostgreSQL](#) | [Live](#) | [Source](#)

- Built a personal-finance product with accounts, transfers, transactions, monthly budgets, savings goals, cash-flow reports, CSV import/export, safer partial imports, responsive dark themes/mobile navigation, automated API tests, and user-scoped data architecture prepared for finalized Firebase identity configuration.

ADDITIONAL ENGINEERING

Advanced Service API - Deployed Flask/PostgreSQL REST API with SQLAlchemy, Marshmallow, Swagger/OpenAPI, pytest, Gunicorn, and CI/CD.

[Swagger](#) | [Source](#)

SOFTWARE ENGINEERING TRAINING

Coding Temple - Software Engineer Apprenticeship / Full-Stack Development | 2026

- Built full-stack applications and REST APIs using React, TypeScript, JavaScript, Python, Flask, SQL, authentication, relational data modeling, testing, Git/GitHub, and deployment workflows.

PROFESSIONAL EXPERIENCE

Enterprise Mobility - Reservation Specialist | Remote | Sep 2024 - Mar 2025

- Supported customers in a high-volume remote environment, troubleshooting account/reservation issues, documenting interactions, navigating policy-driven workflows, and communicating clear solutions.

Tractor Supply Company - Team Member | Willow Springs, MO | May 2026 - Aug 2026

- Supported customer service, inventory, stocking, merchandising, and store operations while using handheld systems and product information to resolve requests and maintain workflows.

EDUCATION

Union Adventist University - Computer Science & Mathematics Coursework
